## Response pictures in various styles

> ℹ️ You can manipulate how pictures from responses are displayed. You can set whether the images are to be cropped or not, change the size of the image, change the padding between images, display a date when the image was created or show image comments.

| Cropped | Original |
|---|---|
|  |  |
| With padding | Without |
|  |  01/02/2021 14:28<br>01/02/2021 15:56 |

> As displayed above you can change the page header for specific pages and you can also do the same with page footers.
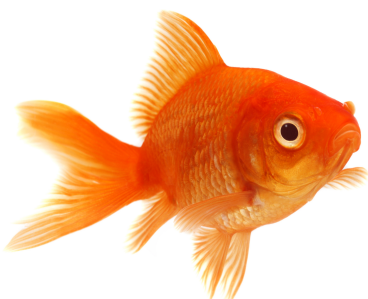

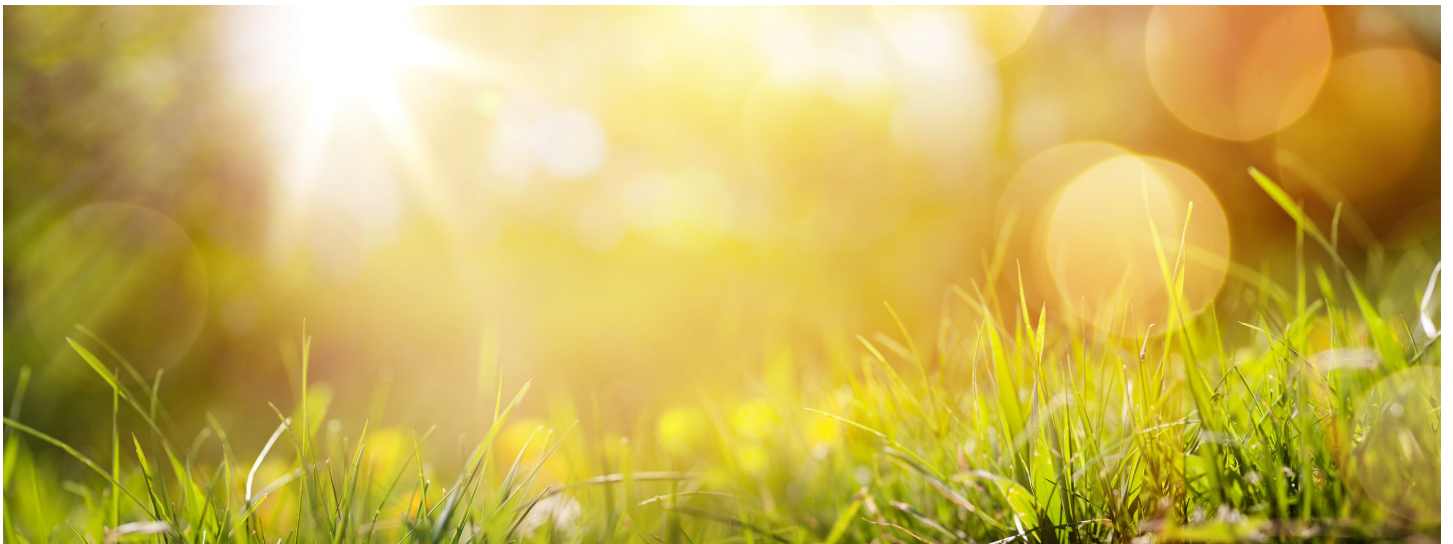

## Static Images

> You can also use images you have uploaded and static text that can contain links.

From **NestForms** help [Images in Forms](#).

It has been said that the human brain processes an image 6000 times faster that text, so it can be very useful to add imagery to your surveys.

Some questions within the form might be reliant on whether the respondent ever saw the subject you're talking about. For instance on the question "Have you seen the leaning tower of Pisa?" many people will instantly recall the famous tower, but some respondents might have trouble connecting the name to a particular visual experience.

# Custom Maps

ℹ️ If you use a GPS Location in your forms, you might use the ability to show the map with a marker instead of just the GPS coordinates. You can also further customize the map type or zoom level.

| GPS coordinates | Map | Map with GPS coordinates |
|---|---|---|
| 48°50'38"N 2°21'36"E |  | <br>48°50'38"N 2°21'36"E |
| **Roadmap** | **Hybrid map** | **Terrain Map** |
|  |  |  |
| **Zoom to world** | **Zoom to city** | **Zoom to streets** |
|  |  |  |
